Project: Sitework for Proposed Industrial Facility

Location: Tennessee

Client: Kelchner

Baumann Land Survey, Inc. provided construction surveying services to the client for a large sitework project covering over 180 acres of parking, access roads, detention ponds, and other stormwater control features. 3D TIN surfaces for use with GPS machine control, as well as staking plans for the layout of fencing and storm sewer structures were created for use by the client. Calculations and exhibits were periodically created from as-built and quantity surveys performed by the client, to support payment applications based on quantities.
